PREFACE.

We take pleasure in presenting to your attention our latest catalogue of Sanitary Specialties. While not illustrating our complete line, you will find in this book many new ideas and designs which we trust will meet with your approval. We shall, in the near future, issue a second edition which we assure you will be complete in every respect. In the meantime we beg to remind you that we manufacture tanks for every known purpose, and an inquiry will be given prompt attention. You will notice in perusing this catalogue, that all the numbers have been changed with exception of our No. 1170 tank. We regret this was necessary, but trust that it will not put our customers to any serious inconvenience.

In ordering, we ask that you kindly mention catalogue "F." This will save time and annoyance.

We shall endeavor to maintain in the future the same standard in every respect, that we have in the past. We shall also endeavor to maintain the position we still hold, as the largest exclusive manufacturers of high grade Sanitary Specialties in America.

Yours very respectfully,

THE BUICK & SHERWOOD MANUFACTURING CO.

SPECIAL NOTICE.

All goods are shipped at Buyers risk; our responsibility ceases when we obtain Receipt from the Transportation Company, consequently all claims for breakage must be made on said Transportation Company.

Boxing and Cartage charged at cost.

All claims for errors must be made within FIVE days after receipt of goods.

All goods returned must be accompanied by letter of advice or we cannot be responsible if credits are not given.

Order by NUMBER ONLY and GIVE CATALOGUE LETTER, as all numbers have been changed in this catalogue

THE BUICK & SHERWOOD MANUFACTURING CO.

“SUCCESS” STEEL BATH TUB.

TRADE MARK.

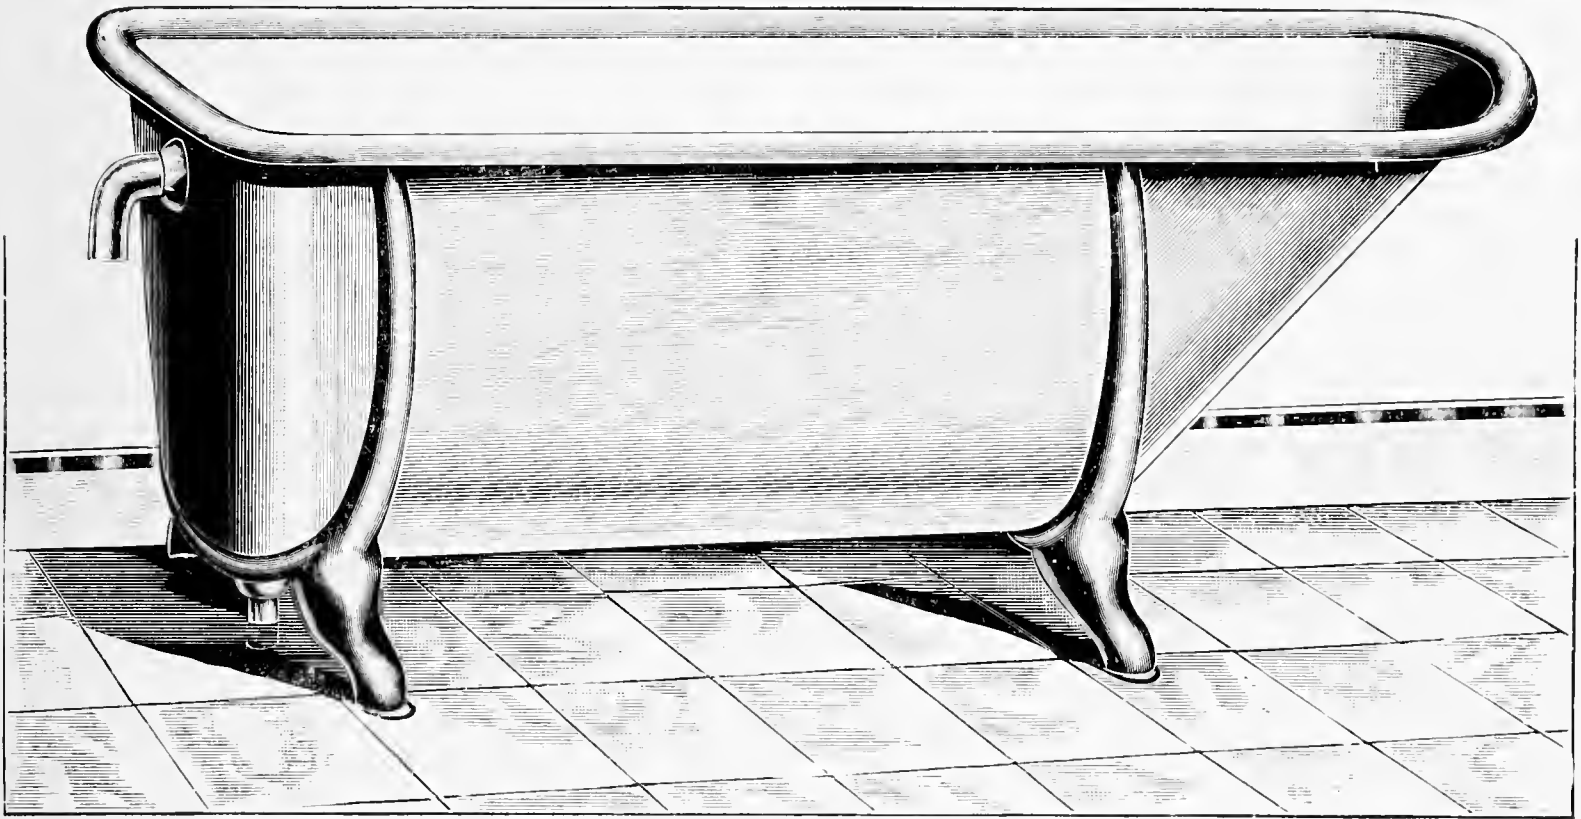

The “SUCCESS” STEEL BATH TUB is something new and superior in quality, strength and beauty to anything ever put on the market. It is made from the finest Bessemer annealed sheet steel, galvanized to make it absolutely rust proof, and instead of copper lining we bake on the inside, four coats of our insoluble enamel (not porcelain) though the enamel can be air dried as well.

Our “SUCCESS” STEEL BATH TUB is handsomely decorated light azure blue on outside of body and with gold bronze legs. It has a combined overflow with plug and couplings, making a very decided saving in price over any other tub made.

In addition to the above advantage our “SUCCESS” STEEL BATH TUB is the cheapest first-class sanitary tub ever offered to the trade. It is especially suited for rough usage in tenement houses where people are known to use bath tubs as a receptacle for ice and wood. In such cases the tub can be made as good as new at a small cost, by simply washing it out and recoating the inside with our insoluble enamel.

Send for our “SUCCESS” STEEL BATH TUB and be convinced that you are getting the best tub ever made for the money. In writing please give the pattern and number of tub wanted with full shipping directions. Our tubs are all fitted for 4 1-2 Fuller Cock and also shipped with Combined Overflow unless otherwise specified.

“SUCCESS” STEEL BATH TUB.

FRENCH PATTERN.

Painted Light Azure Blue on outside of Body, and with Gold Bronze Legs.—N. P. Brass Overflow, Strainer, Plug and Couplings. Fitted for $4\frac{1}{2}$ Fuller Cock unless otherwise ordered.—Hardwood Rim, Natural or Antique Oak, Dark or Light Cherry.

“SUCCESS” COMBINATION TRADE MARK. BASIN AND BATH.

The “SUCCESS” COMBINATION BASIN AND BATH is something new in the tub line. It surpasses and is superior from an economical point of view, to any on the market. Occupies but one-half the space required for an ordinary tub and wash stand.

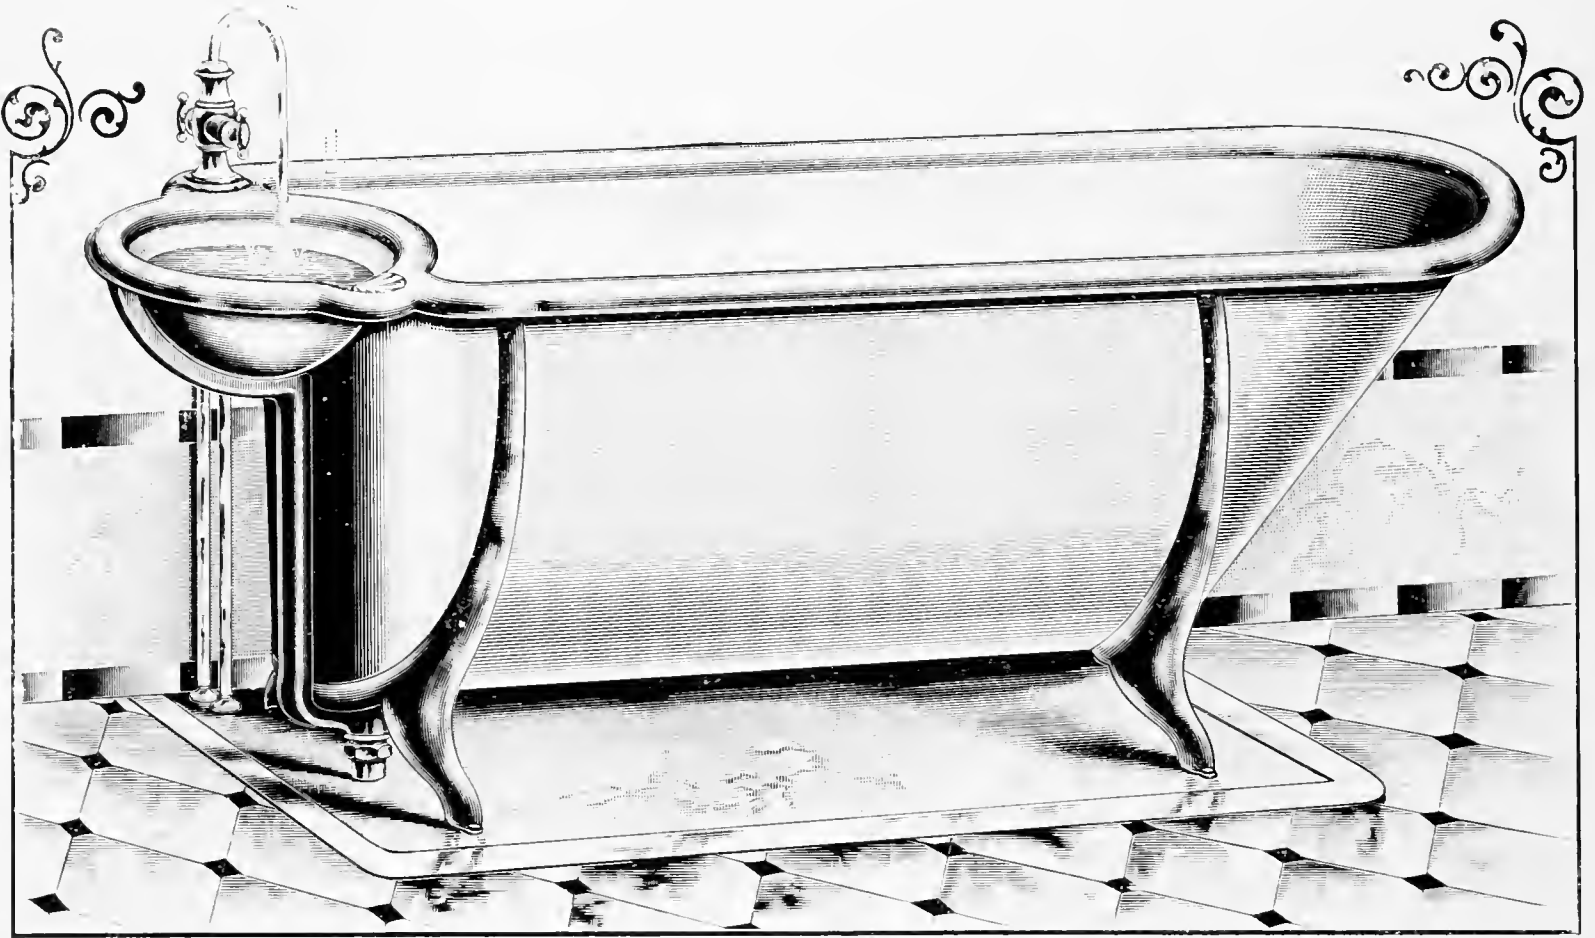

The “SUCCESS” COMBINATION BASIN AND BATH is made from the finest annealed sheet steel, galvanized to make it absolutely rust proof. Decorated light azure blue on outside of body, and gold bronze legs; and instead of copper lining we bake on the inside, four coats of our insoluble enamel with two hundred and fifty degrees of steam heat, though the enamel can be air dried as well. The bowl is cast iron, porcelain enameled and the rim is cast iron, galvanized, and coated with the same enamel as on the inside of tub.

The “SUCCESS” COMBINATION BASIN AND BATH is especially adapted for hotels and all classes of tenement houses. We believe it to be the best combination for rough usage ever used in bath rooms.

This combination will be used on cast iron bath tubs enameled with porcelain.

“SUCCESS” COMBINATION BASIN AND BATH.

PATENTED SEPT. 22, 1896. OTHER PATENTS PENDING.

FRENCH PATTERN.

Complete, including Special Bath Cock with Swivel Nozzle.—N. P. Brass Combined Overflow and Waste.—Nickel Plated Strainer, Plug and Couplings.—The Bowl is Cast Iron, Porcelain Enameled and the Rim is Cast Iron, Galvanized, and coated with the same enamel as on the inside of tub.—Painted Light Azure Blue on outside of Body, and with Gold Bronze Legs.

LOW DOWN TANK COMBINATIONS.

We illustrate on the following eight pages our line of LOW DOWN TANK COMBINATIONS, which are unequalled in this class of sanitary specialties.

The occasion often arises where it is impracticable to use an elevated tank closet, as for instance under stairways and also where it is necessary to place a closet under a window. The fact that it is practically noiseless makes it especially desirable when it is located on the first floor and adjoining a reception hall, etc.

The wood work is made of the very best material obtainable, has a high grade finish and in construction they are as perfect as skilled mechanics can make them.

These tanks can be operated with a Lever Handle, Pull and Chain, or Seat Action. This tank can be placed behind the wall if so desired.

"SUCCESS" LOW DOWN TANK COMBINATION.

AUTOMATIC AFTERWASH TANK COMBINATIONS.

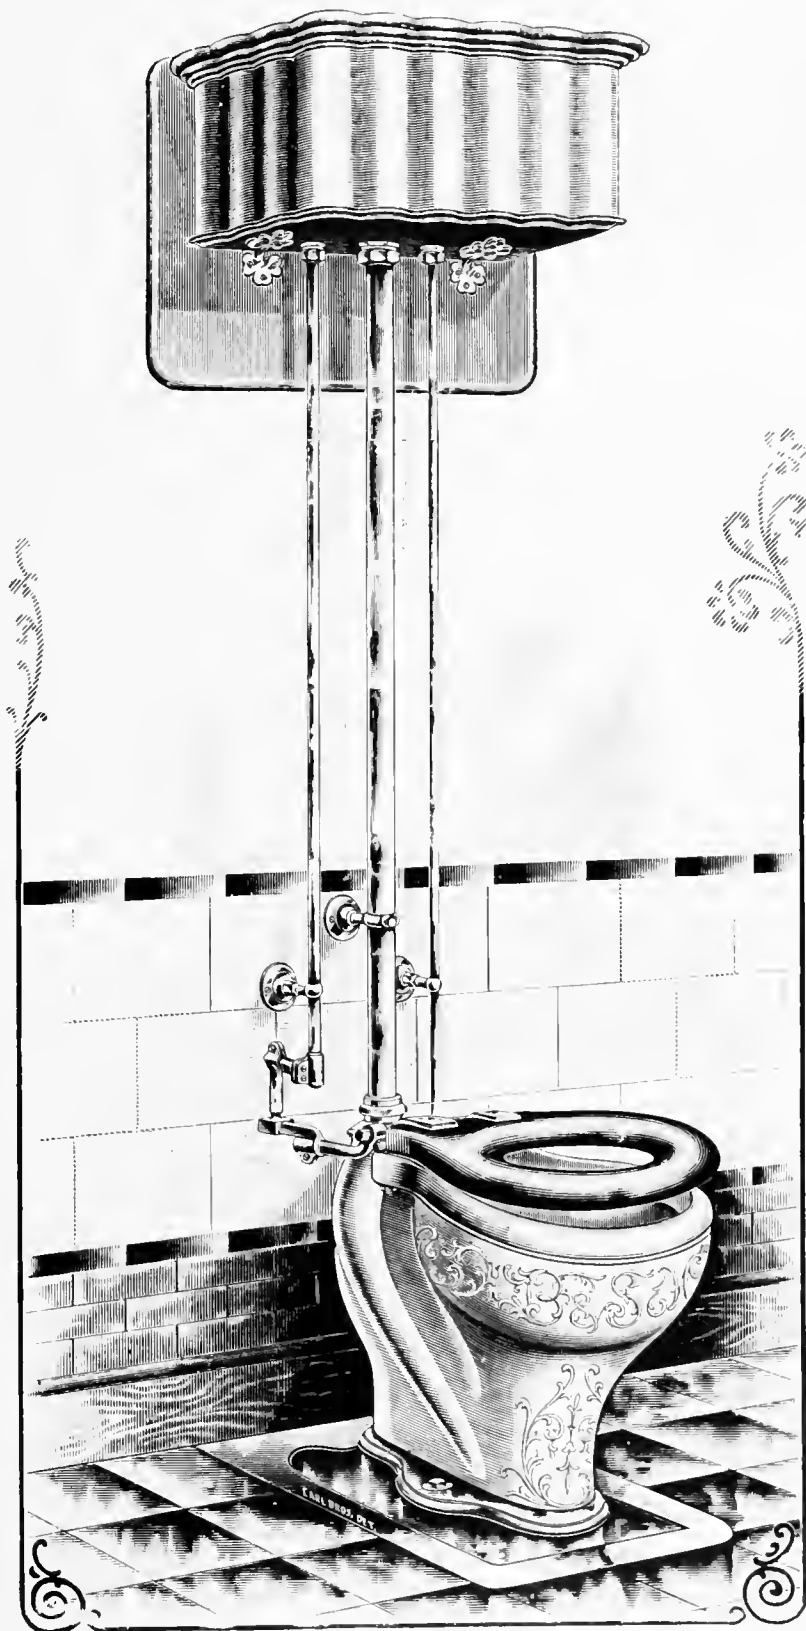

The Combinations as mentioned above, are arranged to operate with Seat Action and are especially adapted for Hotels, Schools, Public Buildings and Manufacturing Institutions. They are constructed on the most advanced scientific principles, and absolutely perfect in action, simple in construction and easily adjusted. Though the illustration includes a Syphon Jet Closet, we also list these with Washdown Closets, making this line of Closets complete in every respect. Our Washdown Closet is also made for Fire construction, on which we will be pleased to make prices on application.

U-B-TA SYPHON JET CLOSET.

We call your attention to our line of Syphon Jet Closets as being complete in every respect. We illustrate many different designs of woodwork with this Closet, a large number of them being new and novel. These combinations are unsurpassed in durability, finish and workmanship. With our years of experience in the business we believe we know what is required for a perfect closet and have endeavored to put the knowledge thus gained in a closet of that style, and fully believe that we have succeeded. These Closets are simple in construction and absolutely perfect in operation.

Instances often arise, however, where a lower priced Syphon Closet than our U-B-TA is desired. In order to comply with the demand for a closet of this character, we also illustrate our "YANTIC," which cannot be equalled in its own particular class. The same care and attention is given to its construction that is given to the "U-B-TA," and the fact that we have listed these so as to cover as many different designs as possible, lead us to believe that our patrons will have no difficulty in selecting a closet according to their own individual ideas.

RUSHMERE WASHOUT CLOSET.

Where a medium priced Closet is required, we invite your attention to our line of Wash-outs. This line is very complete, illustrating many designs, all of which are of the latest patterns. They are constructed with a view to durability and simplicity, and we can conscientiously recommend them to those who desire a closet of this style.

We also make the RUSHMERE with seat attached to operate closet automatically and will be pleased to submit prices on application.
